Prologue: Justification and Method	9
First Part: Relative Basic Durations and Syllabic Equivalences	13
1. Prior Questions	13
The relationship between song and recitation	13
On ancient theory.....	15
The concept of χρόνος	17
The concept of πρώτος χρόνος	17
The concept of πούς	18
On responsion	23
2. Relative Basic Durations; Their Level of Probability and Their Hypothetical Frequency of Use	26
The relative ♩ and ♪ durations	26
The χρόνοι known as ἄλλογοι	29
The τρίσημος duration	32
The τετράσημος duration	34
On the πεντάσημος duration	36
Rests with rhythmic value	37
3. Syllabic Equivalences	39
The equivalence between – and √	39
The possible equivalence between a long syllable and syllabic groups divisible in three πρώτοι χρόνοι	40
The equivalence of inverse groups	40
Catalexis	44
The syllabic equivalence between – and √	48
The syllabic equivalence between √√ and √	48
Possible rhythmic values of syllabic feet in which the equivalence between – and √ takes place.	49
Syllabic equivalence, in the Aeolic base, between groups which are metrically divisible in two πρώτοι χρόνοι and groups metrically divisible in three and four πρώτοι χρόνοι	50
On the responsive restrictions observed in relation to long syllables at the end of a word.....	51
Second Part: Rhythmic Value of Traditional Poetic-Musical Genres	56
1. Dactylic hexameter	56
2. Elegiac distich	70
3. Stichic iambs and trochees	76
The rhythmic affinity between stichic iambs and stichic trochees.....	76
Non-comic stichic iambic trimeter	79
Stichic catalectic trochaic tetrameter	92
Stichic catalectic iambic tetrameter.....	99
The stichic iambic trimeter of comic dialogue.....	101
The choliamb.....	104

4. Anapaests.....	105
5. Aeolic lyric.....	108
On the possible rhythmic value of the syllabic groups present in the Aeolic base.....	108
On the application of the rhythmic scansion based on the inverse groups ♪♪ and ♪♪ to a large part of Aeolic lyric.....	111
The presence of the cell – – outside of the base in verses of Aeolic nature which are analysable via – ∘ and ∘ –	115
The relative duration of the ordinary Aeolic base in verses which are analysable via the inverse groups – ∘ and ∘ –	116
Aeolic dactyls.....	116
The Sapphic strophe.....	120
The Alcaic strophe.....	126
6. Ionics.....	129
7. Cretic and paeonic sequences.....	132
8. Dochmii.....	137
9. Iambo-trochaic lyric.....	142
10. The dactylo-epitrites.....	144
11. On dactylo-trochaic or iambo-anapaestic sequences.....	148
Third Part: Rhythmic proposals for some metrically compound passages.....	150
1. ARCHILOCHUS fr. 188 W, 1–2.....	150
2. ALCMAN fr. 1, 36–49 P.....	151
3. ALCAEUS fr. 140, 2–4 Voigt.....	153
4. SAPPHO fr. 94, 1–5 Voigt.....	154
5. SAPPHO fr. 96, 6–9 Voigt.....	155
6. ANACREON fr. 388, 1–4 P.....	155
7. AESCHYLUS Septem contra Thebas 626–630 ~ 563–567.....	157
8. BACCHYLIDES 17 S-M, 1–23.....	158
9. PINDARUS Olympia I 12–22 S-M.....	162
10. SOPHOCLES Oedipus Tyrannus 168–177 ~ 179–189.....	164
11. EURIPIDES Hercules Furens 425–435 ~ 408–418.....	166
12. EURIPIDES Bacchae 370–385 ~ 386–401.....	169
Bibliography.....	172
