

Table of Contents

Editorial	V
GIScience Contributions for Society	1
<i>Edited by Adrijana Car and Gerald Griesebner</i>	
<i>Barbara Hofer</i>	
Common Elements in Semantic Descriptions of Web Processing Services	2
<i>Martin Sudmanns, Sebastian Cadus and Mona Bartling</i>	
Geodata-based Alerting Service (GAS): A Conceptual Framework to Create Notifications Based on Spatial and Temporal Data	6
<i>Felix Bensmann, Dorian Alcacer-Labrador, Rainer Roosmann, Wassilios Kazakos, Roman Wössner and Andreas Abecker</i>	
Tools for Distributed Geodata Processing Based on OGC Web Processing Services	16
<i>Andrey Martovoy, Clémentine Fry, Prune Gautier, Elisabeth Weinke, Marco Vianello, Arlindo Jose Santos and Cláudio Miguel Santos Cândido</i>	
Indicators for Evaluating the Impact of a Utility Infrastructure's Cloud-based Registry	20
<i>Milena Kocher and Michael Leitner</i>	
Forecasting of Crime Events Applying Risk Terrain Modeling	30
<i>Markus Straub and Anita Graser</i>	
Learning from Experts: Inferring Road Popularity from GPS Trajectories	41
<i>Andreas Eisl and Andreas Koch</i>	
Geographic Modeling: Approaching Reality in Land Use Simulation Pragmatically	51
<i>Elmar Schmaltz, Hans-Joachim Rosner and Michael Märker</i>	
Assessment of Shallow Landslide Initiation Areas Using Stochastic Modelling: The Vernazza Torrent Case Study, Liguria, Italy	61
<i>Bakhtiar Feizizadeh, Khalil Omrani and Fereidon Babaei Aghdam</i>	
Fuzzy Analytical Hierarchical Process and Spatially Explicit Uncertainty Analysis Approach for Multiple Forest Fire Risk Mapping	72

<i>Bakhtiar Feizizadeh, Stefan Kienberger and Khalil Valizadeh Kamran</i> Sensitivity and Uncertainty Analysis Approach for GIS-MCDA Based Economic Vulnerability Assessment	81
<i>Michael E. Hodgson, Alexandria McCombs and April Hiscox</i> Sensitivity of Flux Footprint Modelling to Geographic Resolutions and Autocorrelation	90
<i>Ulrich Strötz</i> Calculating Timber Harvest Costs Based Solely on Spatial Predictors Exemplified by the Colorado State Forest	94
<i>Quynh Huong Nghiem</i> GIS-based Spatial Multi-criteria Analysis: A vulnerability Assessment Model for the Protected Areas of Vietnam	103
<i>Helen Dorn, Tobias Törnros, Markus Reichert, Hans-Joachim Salize, Heike Tost, Ulrich Ebner-Priemer, Andreas Meyer-Lindenberg and Alexander Zipf</i> Incorporating Land Use in a Spatiotemporal Trigger for Ecological Momentary Assessments	113
<i>Johannes May</i> Semi-Automatic Detection of Storm-Felled Forest Areas in Western Norway's Spruce Forests Using a Landsat Time Series and Change Detection	117
<i>Laura Knoth, Azmat Arif and Johanna Schmitt</i> Salzburg Residential Mobility Model	126
<i>Robin Wendel</i> Interactive Network Assessment Tool Using ArcGIS API for JavaScript	136
<i>Heidi El-Hosaini</i> Locating and Positioning Solar Panels in a 3D City Model: A Case Study of Newcastle, UK	147
<i>Catia Gouveia</i> Predicting the Impacts of Climate Change on Protected Areas: A Case Study of Land Snails in Madeira Island	158
<i>Clemens Eisank, Lorenzo Rieg, Christoph Klug, Hannes Kleindienst and Rudolf Sailer</i> Semi-Global Matching of Pléiades Tri-Stereo Imagery to Generate Detailed Digital Topography for High-Alpine Regions	168
<i>Jan-Peter Mund, Robert Wilke, Michael Körner and Alfred Schultz</i> Detecting Multi-layered Forest Stands Using High Density Airborne LiDAR Data	178

The Potential for Extracting Heat Energy from Waste Water: A Strategic Approach	189
---	-----

Stephan van Gasselt and Andrea Nass

Time and Geology in Geographic Information Systems: Some Formalism for Describing Temporal Events	199
---	-----

Mercy Mwaniki, Matthias Möller and Gerhard Schellmann

Landslide Inventory Using Knowledge Based Multi-sources Classification Time Series Mapping: A Case Study of Central Region of Kenya	209
---	-----

Ana Gonzalez Quintairos, Jochen Bühler, Birgit Kleinschmit and Matthias Resch

Analysis of Potential Distribution and Size of Photovoltaic Systems on Rural Rooftops	220
---	-----

Ekaterina Chuprikova, Armin Costa, Markus Innerebner, Roberto Monsorno, Jochen Ernst Wagner, David Moser and Mark Zebish

An Assessment of the Solar Potential of Roofs within a Web-based Solar Cadastre	225
---	-----

Learning with Geoinformation

Edited by Thomas Jekel and Robert Vogler

Sarah Witham Bednarz and Robert S. Bednarz

Brave New World: Citizenship in Geospatially Enriched Environments	230
--	-----

Inga Gryl

A Starting Point: Children as Spatial Citizens	241
--	-----

Stefan Brauckmann

“How Do You Wish to Remember?” – Youth Participation and Culture of Remembrance Using Geo-Information	251
---	-----

Eric Sanchez, George Kalmpourtzis, Jean Cazes, Michael Berthoix and Réjane Monod-Ansaldi

Learning with Tactileo Map: From Gamification to Ludicization of Fieldwork	261
--	-----

Noemi De Luca, Nicole Ferber, Helena Atteneder and Thomas Jekel

Feminist and Queer Approaches to Education for Spatial Citizenship	272
--	-----

Christian Groß and Inga Gryl

Gender-biased Appropriation of Space?	283
---	-----

<i>Christiane Hintermann and Herbert Pichler</i> Gendered Spaces in the City: Critical Topography in Geography Education.....	287
<i>Ainura Nazarkulova and Josef Strobl</i> Central Asia on the Cloud: Prototyping an Open Regional Atlas	299
<i>Florian Hruby, Rainer Ressler and Alexander Wolodtschenko</i> Cloud-based Atlasing.....	305
<i>Durval Silva and Karl Donert</i> Communicating Geography with the Cloud	315
<i>Robert Plötz and Friedrich Barnikel</i> Erasmus+/Comenius-Cooperation of European Schools Using GIS Applications to Assess “Life in Our Neighbourhood – Life in Our City”	320
<i>Stefanie Zecha and Ludwig Hilger</i> EarthCaches: An Opportunity for Learning Geoscience; a Pilot Study for Glaciomorphologically Themed EarthCaches	324
<i>Martin Dür</i> The Use of the Digital “Vorarlberg Atlas” in the Subject of Geography and Economics: Experiences from a School Project	335
<i>Hans-Jörg Stark, Daria Hollenstein, Kevin Hürbi and Thomas Gerzner</i> “IVGI Noise App”: An App to Raise Awareness of Noise Pollution and to Promote Spatial Technologies in Secondary Schools.....	345
<i>Andreas Rienow, Henryk Hodam, Fabian Selg and Gunter Menz</i> Columbus Eye: Interactive Earth Observation from the ISS in Class Rooms	349
<i>Andrea Pődör, András Révész, Attila Ócsai and Zoltán Ladomerszki</i> Testing some Aspects of Usability of Crowdsourced Smartphone Generated Noise Maps.....	354
<i>Aikaterini Klonari and Anna Aikaterini Likouri</i> The Relation of Multiple Intelligences and Spatial Perception with Performance in Geography Education	359
<i>Steffen Höhnle, Rainer Mehren and Jan Christoph Schubert</i> Teachers’ Perspectives on Teacher Training for Better Implementation of GIS in the Geography Classroom.....	363
<i>Thomas Jekel, Nicole Ferber and Kirstin Stuppacher</i> Innovation vs. Innovativeness: Do We Support Our Students in (Re-)Inventing the World?	373

Earth Observation for Humanitarian Operations..... 383

Edited by Stefan Lang and Petra Füreder

Stefan Lang and Petra Füreder

Earth Observation for Humanitarian Operations 384

Petra Füreder, Stefan Lang, Edith Rogenhofer, Dirk Tiede and Andreas Papp

Monitoring Displaced People in Crisis Situations Using Multi-temporal VHR
Satellite Data During Humanitarian Operations in South Sudan 391

Yann Rebois and Friderieke Alschner

Use of Satellite Imagery at the ICRC (International Committee of the Red Cross) 402

Fritjof Lüthje, Dirk Tiede and Petra Füreder

Don't See the Dwellings for the Trees: Quantifying the Effect of Tree Growth on
Multi-temporal Dwelling Extraction in a Refugee Camp 406

Olaf Kranz, Elisabeth Schoepfer, Kristin Spröhnle and Stefan Lang

Multi-scale Assessment of the Environmental Impact of Refugee Camps in the
Context of Climatic Variability 416

Michael Hagenlocher, Dirk Tiede, Lorenz Wendt and Stefan Lang

An Earth Observation-based Approach for the Assessment of the Environmental
Impact of Refugee and IDP Camps 420

Andreas Braun and Volker Hochschild

Combining SAR and Optical Data for Environmental Assessments Around
Refugee Camps 424

Sebastian Langer, Dirk Tiede and Fritjof Lüthje

Long-term Monitoring of the Environmental Impact of a Refugee Camp Based
on Landsat Time Series: The Example of Deforestation and Reforestation During
the whole Lifespan of the Camp Lukole, Tanzania 434

*Sebastian D'Oleire-Oltmanns, Barbara Riedler, Lena Pernkopf, Elisabeth Weinke
and Stefan Lang*

Validation Strategy for User-specific Map Products for the European Copernicus
Security Service 438
