

**Biodiversity and Ecology of Fungi,  
Lichens, and Mosses**

**Kerner von Marilaun Workshop 2015  
in memory of Josef Poelt**

Edited by Paul Blanz

Series editors:

Peter Schönswetter, Tod Stuessy, Christian Sturmbauer & Hans Winkler

VERLAG DER  
ÖSTERREICHISCHEN  
AKADEMIE DER  
WISSENSCHAFTEN

Cover photo: *Caloplaca necator* (left) and *Rhizocarpon kakurgon* (right), two lichicolous lichen species which have been described by Josef POELT, on *Aspicilia*. He studied not only the morphological characters of these organisms but also their way of life and type of interrelationship. For naming new species, POELT preferred for epithets descriptive words like killer (*necator*) and bad guy (*kakurgon*).

Layout: Karin WINDSTEIG
