

CONTENTS

ACKNOWLEDGEMENTS	9
GENERAL REMARKS	11
Abbreviations	11
Field research and related projects	13
Methods of survey	13
Conventions	14
INTRODUCTION	15
PRELIMINARIES	17
1. Interdisciplinarity	17
2. Treatment of research information	17
3. Aspects of tradition	20
4. Aspects of vernacular	22
I. UNIVERSAL CONCEPTS: ON THE MATERIALISATION OF A RELIGIO-POLITICAL PROGRAMME	25
1. Imperial Central Tibetan period (7 th –9 th centuries CE)	25
1.1 Mobile camps and courtly assemblies	26
1.2 Towards monastic establishments	27
2. Early West Tibetan period (10 th /11 th century)	30
2.1 Mobile rulers and religious gathering places	32
2.2 Protecting temples	33
2.3 A religio-political programme	33
3. Ritual space and sacred plan	35
3.1 Geometry and proportion	43
3.2 Orientation as a tool within canonical architecture	48
4. Prestigious building materials to represent a social status	52
4.1 Roofs and floors	53
4.2 Wall surfaces	54
5. Discussion	55
II. MATERIAL TRADITIONS: RAW MATERIAL AND TECHNIQUES	59
1. Significance of local terminology within the study of building traditions	59
2. Earth roofs and <i>arga</i> roofs: A continuity of a flat roof tradition	60
2.1 Two different types of a flat roof	60
2.2 Earth roof construction	61
2.3 <i>Arga</i> roof construction	63
2.4 Discussion	67

3. Earth building material: Pottery and stove making traditions	69
3.1 Regional setting of this study	69
3.2 Raw material for pottery and processing	70
3.3 <i>Thab</i> and its material relation to pottery	76
3.4 Discussion	77
4. Earth building material and Buddhist clay sculptures	78
4.1 Regional and historical setting	78
4.2 Different techniques in clay modelling	80
4.3 Quality of the clay	86
4.4 Surface of the sculpture	87
4.5 Discussion	88
III. EARTH BUILDING TRADITIONS IN BASGO AND LIKIR / LADAKH	91
1. Introduction	91
1.1 Research questions	91
1.2 Origin of the samples	92
1.3 Structure of this chapter	95
2. Research method	95
2.1 Documentation	95
2.2 Laboratory methods	96
2.2.1 Grain size analysis (GSA)	96
2.2.2 Grain shapes	96
2.2.3 Bulk mineral analysis (BMA) by XRD	96
2.2.4 Clay mineral analysis (CMA)	97
2.2.5 Simultaneous Thermal Analysis (STA)	97
2.2.6 Infrared Spectroscopy (IRS)	98
2.2.7 Sample colours	98
2.2.8 Shrinkage	98
3. Mineralogical analysis of the clay samples	99
4. Additional examinations of selected samples	143
4.1 Behaviour of stove material during heating treatment	143
4.1.1 Analysis of the shrinkage	147
4.1.2 Behaviour of the surface during the shrinkage test	147
4.1.3 Influence of minerals on the samples' behaviour during firing	149
4.1.4 Content of humidity to reach the norm stiffness	149
4.2 Calcite as an anthropogenic or natural factor	150
4.3 Content of kaolinite	151
4.4 Tables of results	153
5. Discussion	156
IV. HIMALAYAN COMPOSITE CONSTRUCTIONS AND ENVIRONMENTAL INFLUENCES	163
1. Composite constructions. A general view	163
1.1 Timber frame structures	164

1.2	Bracing of solid walls	168
1.3	Composite constructions in the Himalayan region	170
1.3.1	Core regions Himachal Pradesh, Jammu and Kashmir and North Pakistan	171
1.3.2	Himalayan regions outside the core region	172
1.4.	Diffusion of composite constructions	174
1.5	Relation between diffusion of composite constructions and seismic culture	177
1.5.1	Quality of the ground	180
1.5.2	Structural timber elements	180
1.5.3	Solid walls and timber lacing	181
1.5.4	Elevation configuration	185
1.5.5	Material and joints	185
1.5.6	Wall openings	186
1.6	Discussion	187
2.	The importance of material diversity	189
2.1	Discussion	193
3.	Environmental aspects: Climate and raw material	195
3.1	Research question and method	198
3.2	Research area	198
3.3	Natural preconditions related to altitude	198
3.4	Western Himalayan climate in general	199
3.4.1	Arid climates	201
3.4.2	Cold climates	201
3.4.3	Temperate climates	201
3.5	Climate in the areas of study	202
3.5.1	Jammu and Kashmir	202
3.5.2	Himachal Pradesh	203
3.5.3	North Pakistan	204
3.5.4	Central and West Tibet	204
3.6	Raw material for building purpose	204
3.6.1	Methods of processing raw material for vernacular structures	206
3.6.2	Timber	208
3.6.2.a	Jammu and Kashmir	208
3.6.2.b	Himachal Pradesh	211
3.6.2.c	North Pakistan	213
3.6.3	Stone	213
3.6.3.a	Commonly used stones as building material	214
3.6.3.b	Stones following a geographical order	215
3.6.4	Clay	216
3.6.4.a	Jammu and Kashmir	220
3.6.4.b	Himachal Pradesh	221
3.6.4.c	North Pakistan	224
3.7	Discussion	224
4.	Aspects of construction	226
4.1	Ladakh	230
4.1.1	'Simple' timber lacing (horizontal timber straps along wall faces)	230

4.1.2	'Ladder'-like timber lacing	231
4.1.3	Wattle and daub	232
4.1.4	Bracing of rammed earth lintels	233
4.1.5	Investigated objects	233
4.2	North Pakistan and Nuristan	243
4.2.1	<i>Bhatar</i>	244
4.2.2	<i>Cator and cribbage</i>	246
4.3	Kashmir	248
4.3.1	<i>Taq</i>	249
4.3.2	<i>Dhajji-dewari</i>	252
4.3.3	<i>Cator and cribbage</i>	253
4.4	Eastern Lahaul, Spiti, Upper Kinnaur and northern region of Middle Kinnaur	255
4.4.1	Eastern Lahaul	255
4.4.1.a	Investigated objects	255
4.4.2	Spiti	258
4.4.2.a	Investigated objects	258
4.4.3	Upper Kinnaur (Hangrang Division) and Middle Kinnaur (Ropa Division)	259
4.4.3.a	Investigated objects	260
4.4.3.b	Construction of early West Tibetan monasteries for comparison	264
4.4.4	Middle Kinnaur (Sairag, Jangram, Upper Tukpa, Sumcho)	265
4.4.4.a	From <i>dhol-maide</i> to <i>kath-kuni</i>	267
4.4.4.b	<i>Farque</i>	269
4.4.4.c	<i>Dhajji-dewari</i>	270
4.4.4.d	Investigated objects	270
4.4.4.e	Koti banal (Uttarakhand) for comparison	275
4.5	Shimla District (Rampur Division)	281
4.6	Kullu, western Lahaul and Chamba	281
4.6.1	Kullu District	282
4.6.1.a	Investigated objects	282
4.6.2	Western Lahaul	283
4.6.2.a	Investigated objects	283
4.6.3	Chamba District	285
4.6.3.a	Investigated objects	285
4.7	Discussion	289
V.	SUMMARY AND FUTURE PERSPECTIVES	295
1.	Summary	295
2.	Future perspectives	296
VI.	APPENDIX CHAPTER III	297
VII.	APPENDIX CHAPTER IV	359
VIII.	BIBLIOGRAPHY, CORRESPONDENCE AND INTERVIEWS	365
